```javascript
// App.js
import React from 'react';
import { TaskProvider } from './TaskContext';
import TaskList from './components/TaskList';
import TaskForm from './components/TaskForm';
import TaskFilter from './components/TaskFilter';

function App() {
  return (
    <div>
      <h1>Lista de Tareas</h1>
      <TaskProvider>
        <TaskForm />
        <TaskFilter />
        <TaskList />
      </TaskProvider>
    </div>
  );
}

export default App;
```
